Sanjeethan Jeganathan

Profile

I am a Data Science student at Cardiff Metropolitan University and an Application Support Executive Intern at Wipro. I also have experience working as an E-commerce Analyst. I like using data to solve real business problems and help people make better decisions. In my current job, I work with project and finance data. I track invoices, resources, and project progress to support smooth operations. Before this, I created and improved TikTok and Meta ad campaigns, email marketing, and weekly performance reports, using results such as CTR, ROAS, and conversions to guide changes.I want to grow in data analytics and data science. I am open to internships, entry-level roles, and projects where I can turn data into clear and useful insights.

Work Experience

Jun 2025 – Present
Wipro

Application Support Executive Intern

- Facilitated project tracking across the full SDLC by designing dashboards to monitor milestones and health metrics.
- Acted as a link between business stakeholders and technical teams to translate requirements into functional specifications.
- Supported project teams by assigning resources based on project needs, timelines, and workload.
- Tracked contractor allocations across multiple projects to ensure correct usage and availability.
- Created purchase orders (POs) for contractors to support accurate cost tracking and payments.
- Assisted with revenue collection follow-ups and supported stakeholders when project managers were unavailable.
- Prepared ad-hoc reports and system data to support decision-making and project monitoring.

Feb 2022 – Apr 2023
